The Monitor's view

### Hope for U.S. schools

As another year of school dasegregation begins in the United States, successful carrying out of the law depends upon citizen support, media responsibility, and — above all — public and private leadership. Even with all the recent deficiencies in these respects, desegregation has proceeded much better than suggested by the headlines and TV images of

penceful start with strong official support for a new court-ordered desegregation plan involving both mandatory and voluntary busing.
Superintendent Noian Estes himself drove one of the buses in one of those small but symbolic acts that constructively contrast with neutral or negative nttitudes of school and community

leaders in some other placea. Leadership is the crucial element in making desegregation work, according to a 10-month study by the U.S. Commission on Civil Rights. The new school year provides an opportunity for atrong leadership to come forward in such cities as Boston and Louisville, where it has been conspicuously insufficient.

Again it must be noted, especially for readers and viewers remote from these cities, that the highly publicized difficulties of desegregation, much as they have to be dealt with, are not the whole story. The Commission on Civil Righta does eite such Boston problems as lack of public and private support for implementing the law, "equivocal public statements" by Mayor Kevin White and President Ford, minimal compliance or outright resistance by the school committee, and "sensationalized report-tie" of violent episates. But then the commis-sion individual to a commis-sion which desegregated did so "without

As for Louisville, the commission finds fallures of leadarship among elected county officlais, tha school board, and the Chamber of Commerce. It notes that some businessea turned away from support of the court-ordered desegregation plan in fcar of retaliation from opponents of it. Neverthaless the commission found that atudenis generally responded posttively to desegregation and that it proceeded with "minimal difficulty."

The commission gives credit to well-developed buman relations programs within schools to facilitate the process. It is in such prepara-tions, including their extension to the community on the basis of eccurate information, that a prime means for emoothing desegregation iles. Now that a federal appeals court has upheld Louisville's plen, we hope it will go forward with full cooperation at all levels.

No one is enthusiastic about court-ordered busing as such. Where it has become necessary through failure to ochievo desegregation by other means, it should be administered feirly. Ordinarily protest on this score comes mainly from whitee, but as the first schools opened this week, there was some black protest in Dallas - and, in Alexandria, Louisiena, e black case et Algiers three years ago. boycott expressed dissetisfaction over a plan

### African shuttle for Kissinger

Tanzanian asks him to act as southern Africa broker

By Tnkashi Oka

Stoff correspondent of The Christian Science Monitor

Tanzunin's invitation in U.S. Secretary of State Henry A. Kissinger to begin shuttle diplomocy between black and white African states menns that the Secretory will apply nogoliating techniques honed in the Middle East to one of the world's most colurful, explosive, and potentially iragle hot spots - southern Africa.

The prospects are not encouraging. But the alternative, as Dr. Kissinger's negotioting partner, South African Prime Ministar John Vorster, once said, le "too ghastly to contempleto." Failure to achieve a pesceful settlement in snuthern Africa would mean increasing violence between black and white and the probable intervention of the Soviet Union and/or other Communist countries on the side of the blacks. This would lead to perplexing, even heartrending dilemmas for the West.

Already the acid tang of tear gas hangs heavy over streets in Cape Town's picasant white city center, while riuts by black and Culored (mixed race) youths spread to other South African towns and suburbs.

The summit of five black presidents in Dsr es Salaam has broken up without achieving une of its main purposes - uniting the quarreling black factions in Rhodesia confronting the minority white regime led by Prime Minister Ian Smith. The unly point on which thore was apparent agreement was "to further intensify the armed atruggle in Zimbebwe" - as Africans call Rhodesia.

Mr. Vorsier, who used the word "progress" to describe his weekond talks in Zurich with Dr. Kissinger, is back in ids own country. There he has begun a heetle round of speeches end private discussions almed of securing consensus within his deeply conservative National Party. which has ruled South Africs on a basis of apartheid (racial segregation) and white aupromacy continuously for most of the years since World War II.

If the Kissinger mediatory effort is to aucceed, Mr. Vorstor has a threefold task, which so far he will not acknowledge publicly and to which the degree of his commitment remains uncertain:

1. iio must convince Mr. Smtth that his obstinate stand tor continued white rule in Rhodesia is no longor acceptable to South Africa and that the only alternative to a destructive guerrilla war is acceptance of a rapid transition to black majority rule.

2. Ho must give desolate Namibta (South-West Africa), rich in uranlum and diemonds, independence as quickly as possible, on a multiracial baals. He has already conceded the principle of independance. But ha must now give it substance by including SWAPO, the country's ermed roeistance movement, in future negotiations

3. He will have to show some movement away from his government's repressive domestic policy of apartheld, which has caused and is ceus-ing such tragic upheavals, especially among young blacks.

### Paris: the bad news could be no news

Special to The Christian Science Monitor

The Parisian press is in deep trouble. Newspapers are disappearing and of thosa that remain, all but one - the prestigious afternoon daily, Le Monde - are losing readers or running heavy deficits, usually both at ooca. From 39 dailies in 1939, the number hes

ary city - and at least 4 of these 10 are in immediate financiat difficulty. The most dramatic case, and one which has caused an outburst of protest during the past month, is that of the populer style France-Soir, once France's most widely read newspaper.

With the advent of television, fewer and fewer young people are reading newspapers. France-Soir's regular circulation has dropped by more than half since 1958, and now boyara around 550.000:

With a \$4 million yearly deficit, the newspaper was finally sold in July, and the result has been a political dispute, a 10-day strike by France-Soir's journalists, and a street demonstration by several hundred other journalists marching in sympathy.

In the eyes of the journalists, the villain of the leves of the journalists, the villain of them took their case to count in the leves in the place is right-wing member of Parliament, dating from 1944 and frequently circumvented, and newspaper magnate Robert Hersant, who prohibits in principle one man from owning ments, argued that his purchases have saved the hourse them one newspaper.

is being called a French Hearst.

"But there is a difference," waith Paul
Parisot, the editor who heads France Soir's
ipurpalities and on the states of the publishers, such as Axel Springer in west Germany, founded newspapers. Hersant buys them." Mr. Hersant-controls more than 30 grovincial dallies, magazines, and specialized publications, owns six sinciders, printing plants; and makes no secret of this belief that newspapers are businesses, like any other. If he is allowed to control Prance-sor, the contails argue, one prench newspaper reader in six will be informed by a Harsant owned paper.

One year aggrant Hersant bought the alling 12 Figure, Paris's largest and most infoential impraint newspaper. Ho launched an egressive

morning respaper. Ho launched an egressive cost outling, program, including staff cuts, which journalists at France-Solr believe havo

Spam's Army is "essentially in agreement,

but suffers from a generation gap.

That is the view of Army Minister Lit. Gen. Felix Atverez Arenas. Tho general'a comments, made in an interview with the Roman Cetholic Mndrid daily Ya, are thought to reflect the inflitury hierarchy's view of Spain's fluid domestic and international situation.

The 366,000-man, traditionally aluof Army, often cailed "the ultimate arbiter," remains a favorite topic of conversation in pulitical circies here. Opposition mombers out diplumots ennsider the Army's attitude and the elting economy two uncertainties that enuld determine whether Spain opts for democracy ur for a recycled version of Francoism.

The army's position has been cluuded since March 10, when e military court gave an srmy major end eight cepteins 30-month to eight-year sentences for military sedition. This stemmed from their membership in the clendesline teftist Militery Democretic Union

The UDM boasts 500 members end 1,500 sympathizers emong Spatn's 10,000 ermy officers. It claims to be watching right-wing generels who might try a coup, but top militery offleers fear the UDM wants "anothar Portugal." The UDM, Meanwhile, has dramatized he army's young-old divisions.

The young dissidents demand democratte elections, a provisional government, and better military conditions. The older right-wing officers publicly pleed nonintervention, but there were violent revolutionary-type disorders, civilian and political talerference in army affairs or in a serious separatial movement it is thought the generate might inter-

This summer's amnesty freed the convicted DM mendoers and estimated a key UDM denand. Today, the Army is said to be "solidly chind" King Juan Carlos.

If true, this would expletn Generat Arenas's confidence. Ya said he wes relexed, friendly, and did not ask for questions in advance of the

Spaniah troops: would they follow generals in event of a crisis?

• The Army's overall mood: "Tho armed forces also hava generalional differences as occur in civilian tife. . . . . However, the mtlitary as a whole is essentially in egrecment since we have the same ideels and objectives

military could naver become too dominant. vited to integrate [into NATO] nor have we political crisis?

ssked [to join]."

• The mititary's reaction should Morocco claim Spain's remeining encieves on the North Africen coast - Ceuta and Melilla: "The military would defend [them] since its principal mission to lo dafend the fatherland's integrity. Ccuta and Melilla are Spenieh soil."

**Europe** 

• The militory dreft: One year's reduction Possible military resetion to an elected of the required two years' military service is left-wing government: "The armed forces are being donaldered. (Students have recently dealways respectful of the established order. The manded changes in the draft tsw. In eddition, military would metatain the seme attituds as Spain is one of Europo's few countries that now, at lasst until [our] actual misston does does not recognize conscientious objectors. Many are jailed).

• Army organization: He fevors a defense Analysis here point out General Arenas's ofwasters. General Presses apparently kept the ficial acknowledgement of "generational difarmy divided into three branches to ensure the ferences" again raised the question: Would lower ranks obey if the generals issued anti-• Spain end NATO: "Spain has not been in- democratic orders during a serious domestic

### Dublin to Britain: a helping hand and a slap-down

By Jonethen ttersch Special correspondent of The Christian Science Monitor

### Russia can't fill Ivan's plate without importing

**Europe** 

By David K. Willis Staff correspondent of The Chrislian Science Monitor

When Ivan Ivenovich and Ida wife pick up their airing bags and go shopping these crisp early autumn days, they have trouble finding meat, nilk, tomntoes, encumbers, and epplea. Bul breed la avaifeble, and next yeer meal, bread, end milk should be in good supply.

Vegelables and fruit for next yeer are etill a question mark, however. And to make doubly sure of enough most and bread (ea well as to build up reservea and supply markets in Eeatern Curope) Noscow still is buying grain from the United Stales, Ceneda, end Austrelle.

This is the food picture in the Soviet Union as hopes brighten here for good results from the current harvest to offset lest year's worst showing since World Wer II. Vegelables end fruit beve been affected by e late spring end a colder-than-usuel summer.

A vast army of fermers, combines, and khaki Army trucka is still spread ecroas the fleids of the easiern half of the nation gathering in grain. The western (European) harvest is already in. (It is usually about half the to-

Weetern experts gradually have been raising their estimates of the final figure for the last three months. The latest estimate from the Agriculture Department in Washington is 195 mlllion tons, against t40 million last year. A new department estimate is due in a few days; some officials have been estimating as high as 205 million tons. This would be just under the Soviet target for the year of 207 million. The Soviet record is 222.5 million lone in 1973.

Other Western estimates range from 190 to 200 militoo tons. Soviet party leadar Leonid Brezhnev, speaking in the grain aree of Ka- ited himself to the comment that "matters" zakhstan iste last week, gave no overall figure but estimated that the country "will have enough grein this year."

At the same time Mr. Brezhnev officially adplant more winter crops (mostly wheat end

On Russia's farms: poultry supplies are said to be 'improving'

of meat and other animal products. Farmers at least 6 million tens from the United States - publice. killed much livestock last winter when grain supplies were too smell to feed them.

fle said major efforts had been made to prevent losses in breeding stock. The nation, be said, now bad more beof end dolry cattle then fast yeer. On poultry, cheep, end pigs, he limwere improving."

Much depends on the weether from now on. Meanwhile, Mr. Brezhnev urges fermers to mitted for the first time continuing abortsges rye) - and the Soviet Union is obligated to buy

under the long-term grain agreement that be The istter were the reason for President gins Oct. 1. On top of the 6 million, Moscow Tito's warning in 1971, which he has repeated bas contracted for purchases from Canada and often, that if domestic opponents caused in Australia, raising its estimeted importe for the rest, outsidere might be tempted to lotervene It will re-export about 2 million).

This also illustrates the continued drag of much celmer today. Talking with many of last year's grain shortfall: Moscow had hoped President Tito's closest aldes and with high to reduce its imports from the 12 million or so perty officers, with business directors and or tons it hed purchased each of the previous four dinary. Yugoslavs one gains a etrong impresyears. This will have to walt another year, aton of greater harmony and homogenet

### Yugoslavia: calmer mood prevails

By Eric Bourne Specief to The Christien Science Monitor

Beck in the eerly 1970s Yugoslavia was threatened by a disruplive separalist movement, but today no one talks in healed leros of internel differencee, let elone of civil war.

Five years ego President Tito couniered the separetist campaign in the Republic of Creals with radical measures, including purges and legislative reforms. He had been badly joiled by the fact that the Croallan movement was heeded by local communists.

Wholesale dismissals among Crosile's orth leadership were followed by purges in med other republice. Wilhout such action, the Presdent sald, "Others [meoning the Soviet Union] might have etepped in to 'restore order.'

After the purgee, mejor reforms met the Croets' legillmate economic profests. The tex Constitution of 1974 eet up a collective presdoocy representative of all six republics and the two eutonomous provinces.

It bolstered the autonomy and equality promised the republics by the previous constitution. Those freedoms often had been severely curtailed in practice.

Meantime, there have been other purges and Imprisonments of so-called irredectists in the backwerd southarn erea of Kosovo (where Belgredo'a cartlar disregerd of the feelings and espirations of the Albanian minority led lo serious problems) and of pro-Soviet groups the Cominformists - uncovered in various re-

1978-77 year to about 15 million tons (of which. Nobody doubte who those outsiders would be

For verious roesons, the whole country is among the republics than hitherto. The collective presidency (designed for the post-Tio period) seems to be more closely knit and fest

publics remain; but consensus and common But for every trensmitter which is put out of eense compromise are emphasized. The recent opening of the railroad compecting Belgrade with the southern Adriatic port of Bar offers asked one newspaper more than three years one example. A greatly enlarged harber at Barwill bandle traffic that otherwisa would go 10 the northern ports.

Two years ago, a police officar wrote to the ft asid that the new railroad youth oawspaper Komsomolskaya Prayda to the poorest republic, Monteoero, at some Crost In Zagreb, the capital of Crostin one has backward regions,

Most of those caught by the police are fined. The extreme nationalism of 1971 resulted whater their equipment confluented. The partly from an aconomic boom, which only for a brief period - and moves from place fosses in exports to Western industrial nations.

### Giscard to keep tighter hold on foreign policy

By Jim Browning Special to The Christian Science Monitor

President Giseard d'Eslaing is louching up his foreign policy, but it is more a matter of sivle and emphasis than of direction.

The returnshing now under way accompanos the recent Cabinet changes and the appointment of a new Foreign Minister, Louis de Guringaud, bi succeed Jean Sanyagnargues. Mr. de Guirtngand is a former Ambussador in the United Nations and an expert of relations with the "Ihird world."

The changes of emphasis in foreign affairs are likely to be:

the United States, as President Giscard sharply criticized for signing a deal to sell d'Estaing moves slowly away from Gaullist na- South Africa two nucleur ceacturs (a deal the • More specific overtures toward European

outy, a major interest of the new Printe Munister, Raymout Barre.

• An effort to share up deteriorating relations with the "tlack world." • An even closer concentration of foreign-

policy decisionmaking within the office of the The first solld indication that something new

is in the offing came Sept. I after the first regular meeting of the new Cubinet. The Presi-

criticism recently by both U.S. Secretary of State Henry A. Kissinger and the conference of nonaligned nations, which met last month in Sri Lanka (formerly Ceylon).

Dr. Kissinger, thring a special visit to Pakistan and a vacation in northern France, hait truel to block French plans to sell a nuclear fuol-reprocessing plant to Pakistan. The nonaligned nations had shocked the French by pairing them with Israel in a call for a full oil emhargn ogainst both countries, accused of selling nrms to South Africa.

The Christian Science Monitor Moscon The shape of e possible new stretegic-arms ilmitetion agreement between the Soviet Union and the United States is beginning to emerge. And it is at least conceivable that such en week of October, just before the Nov. 2 elec-

> Based on soundings by this newspaper in both Moscow and Washington, elements of a possible pact begin to look like this:

By David K. Willis Staff correspondent of

defense

I. The Soviete have raised the possibility of committing thamselvee in eny new agreament to quick, subsequent telks aimed at reducing bomber wee included by 10 percent the overett offenetve-waapone limit for both sides which wee provisonally set at 2,400 at the Ford-Brezhnev eummit in 1974 in

It is not known publicly whether the Soviet idea includes a 10 percent reduction in the number of missilee capable of launching from land and see multiple warneads, eech able to eplit off in flight and apeed to separate targets. That Vladivostok figure was 1,320 (included in the overall 2,400).

A I0 percent cat in the 2,400 figure would bring it down to 2,160. Although the strategicarms numbers game is extremely complex, it could be argued that such a reduction might cost Moscow more than it would Washington in the short run. Under the first atrategic-arms ilmitation talks (SALT) pact of 1972, Moscow is allowed 2,358 launchers consisting of t,618 Intercontinental ballistic missiles (ICBMs) and 740 submarine-leunched missiles. Waehington is allowed 1,710 consisting of 1,054 ICBMs and 556 submerine-leunched missiles.

The United States compensates for the numerical difference by possessing thousands soviet officials repeatedly have made it clear that they are worried by the cruise. They

While tha mix between ICBMs and submarine-launched missiles can be varied (within limits), the overail totale are constant. Add in milee, some experta have estimated. The seathe 140 Soviet long-range bombers and about launched variety could fly about 1,800 miles, it 500 U.S. bombors (all heavy bombers were ex-

the United States 2,210.

The Vladivostok provisional eccord, if finalized by an official Salt tI, would force Moscow to come down to a maximum of 2,400 (which it could do by scrapping 100 of its older TU-95 bembere known to NATO as the Bear) A to agreement could come in the third or fourth percent cut below that would mean cutting into some sea or land launchers.

Washington on the other hand would need only to come down from 2,210 to 2,160 under a new 10 perceni reduction. This could be achieved by eliminating some oldar bombers. The swingwing FB-It1 ericraft based abroad world be unaffected since it was excluded in Vledivostok, although the controversial B-1

A longtime Ford adviser has told this newspaper that a last-minute arms agreement is possible before the Nov. 2 election.

And according to Defense Secretary Donald Rumafeid, the United Stetes still leade the Soviets in MIRV warheads by 8,900 compared

The Soviets are closing the gap, however. Their current figure is 1,000 more than lest

A proposed 10 perceat trim in this aree could affect the United States initially while reducing the ultimate ceiling for the Soviete. 2. The 10 percent possibility apparently is in-

tended to balance Moscow's continued inststence on ilmite on testing and deployment of the U.S. cruise missile - the unmanned, low-flying, remote-controlled rocket that, when fully de-

want its range curtailed. Soviet versions of the cruise can fly only relatively short distances,

The U.S. air-launched missile now being developed has a potential range of about 7,000

cluded from SALT t) and the Soviets have a fo-tal of 2.499 launchera on land, sea, and air, and

The Sovieta are believed not to be unhappy and subsequent talks on the 10 percent issue with a resolution introduced into the Senate might find the Soviets deeling with a brand werd M. Kennedy, and Hubert H. Humphrey delay, it is thought. Congress next yest may miles and the ses-launched to 372 milce.

3. The Soviets want their Backfire bomber tinue excluded from any new arms egreement on the On the other hand the Soviets prefer to nego-

There has been speculation in Washington that President Ford may be about to accept contention - which would meen directly overruling aome Pentagon generals and risking the lre of such hard-linere as Republican Ron. provide the necessary impetus. ald Reagan and Democratic Sen. Henry M.

### Will U.S. bring home its troops?

Ford says troops abroad are needed; Carter says they can be brought home

By Richard L. Strout Staff correspondent of The Christlan Science Monitor

The United States has 450,000 troops abroad and that may be a big issue in the upcoming presidentlet campsiga.

President Ford and Democratic candidate Jimmy Carter express sharp differences over defense costs and eo do planks in rival party platforms. International policy in this field may hinge on the election resull.

"We cannot retreat from the front lines of freedom if we are to preserve freedom here at home," ha said. "Phased withdrawal" he said, were code words for "voicee of retreat." At e Plains, Georgia, press conference in July Governor Carter lavored "carefully staged withdrawals" and said he would remove most of our troops from South Kores ... We still have too many military bases and troops overseas," he

The Democratic platform says: "We believe we can reque present defense spending by about \$5 billion to \$7 billion."

However, this should be based on "careful essessments" to "reassure our alites and friends," the platform edds.

The Republican pletform wants 'a national defense eccondto none"; "o period of sustained growth in our defense efforts"; production of the confroversial B-1 bomber (new postponed for congressional action until after the election); and it promises: "We will increase our Army to 16 divisions."

The big defense issue leads directly to America's posture in world affairs. For example, with 42,000 troops in South Korea, the axe-murder of two American soldiers there over trimming a poplar tree could have precipitated a Korean war. ..

The privotely financed Center for Defense Information estimates the U.S. has from 681 to 686 nuclear weapons in Korea, from tactical shells up to large strategic bombs.

On June 23, Governor Carter told the Foreign Policy Associ ation in New York that he favored phased withdrawal "over a time span to be determined after consultetton with both South Korea and Japan." He criticized the South Koreaa Govarnment for "internal oppression."

Europeans watch with interest.

Christian Science

Monitor

U.S. troops in Europe are supposed to be the trip-wire to aesure American nuclear protection against Soviet invasion.

"The American Army does not keep 41,000 men in South Korea mainly for the sake of the South Koreans," explains the of lapan because a still almost militarily naked Japan because Write now, quoting refervolld hate to see Communist troops only 100 miles away across the Tsushima Straits; and because most of the rest of us would hate to see a Japanese Army suddenly expanded six times over. . . It is the American commitment to Japan that has led to the entangling commitment in Korea."

Catholic church in clashes with governments

Latin America

By James Nelson Goodsell Latin America correspondent of The Christian Science Monitor

The Roman Catholic Church is increasingly at odds with a number of governments in Latin America. The signs are many:

· When three Chilean Cutholle bishops, reluming from a church conference in Ecuador last month were hostilely greeted by crowds at Saatiagn's Pudahuel Airport, that country's Catholic hierarchy accused the government of nulhoring the violent demonstration. It also excommunicated lour government officials.

· Earlier in August at the seaston in the Ecuadorien city of Riobemba, 37 churchmen from around Latin America were arrosted, dotained overnight, and then expelled from the country for laking part in what the government tormed "a subversive plot." Ecuador's church hiorarchy promptly accused the govornment of ilicgally interfering in church activities.

· Argentina in recent months has been arresting churchmen and young seminarians, including one United Stotes priost, on charges of subversion and of possessing Marxisi-Leninist titerature. The U.S. clergyman was released. but the fote of if others in unknown and the Argentine hierarchy haa issued e series of pro-

• Meanwhile, Brazil's Dom Heldor Câmara, a longtime opponent of the Brazilian Govern-ment and bishop of Recifa and Olinda, issued e new criticism of govornments in Latin America, saying they "no longer serve the people."

Behind these and other developments is a sharp ideological dispute that has led to the most serious deterioration in church-stale relations in yeors.

Not since Cuban Prime Minister Fidel Castre tangled with that country's Roman Catholic hierarchy haa there been auch a church-state

In that struggle, which evectuelly resulted in a standoff, the church took a hesically conservalive approach, Dr. Cestro a much mora lib-

### South Africa

Blacks write their protest in violence . .

### Whites are gradually reading the message

Stalf correspondent of The Christfan Science Monitor

Durban, South Africa

Across South Africa black profests and rtots rumble on, their implications gradually dawning on the litherto broadly complacent and insheken white population.

This reporter has talked with several community leaders across the country who believe Prime Minister John Vorster is using the viots and protests, allowing them full press publicity in order to change the thinking of his people.

The Anglican Dean of Umtata, the Rev. Watter Goodalf, says the government could casfly quash publicity as it did in the killings during n peasant uprising in the early 1960s in the Transkel, then designated es a Iribai homeiand and due to become an "independent" homeland next month. Instead, says the dean, the guvernment is allowing publicity and probably encouraging the black, government-paid homeland leaders to make demands for change.

But what the newspapers have known and said with some alarm does not mean the white populace as s whole hae shared that concern.

Only after the demonstrations and violence in the center of Cape Town is the mass of

South African whites: beginning to ask what it all means

whites beginning to wonder what is wrong. Many whites can identify with Adderly

race) and black marchers and white onlookers. Honai Porty has been in power, they have been

walked on Adilerly Sircet and shopped there And they are "ninazed that the center of the town could be closed off," as a young holely ecptionist here said.

"Oh, is that why?" replied this woman, who grew up in Canc Town, when I explained the marchera were protesting because the wanted the abolition of apartheld (the less) separation of the races).

White newspapers have reported in detail and firsthond what happened when large numbers of whites were caught in the lear gas is the heart of town. It was the first time while had been involved in the police action.

And the report Tini Vorster, the Prime No. ister's wife, was among those caught in the teargas while shopping undoubtedly will have an effect on Afrikoner thinking. The direction pact of black ond Colored unrest could re have been brought home more symbolical

Such symbols are important in a society to does not read extensively. A lot of water class whites in South Africa read headlest look at pictures, and devour the spatiages is the newspapers.

Therefore the process of educating walled a changed way of thinking is slow, especially and buckshot Sept. 3 against Colored (mixed since, for the 20-plus years Mr. Volsier's M-Whites from throughout South Africa have steered toward occeptance of apartised.

### Street, Cape Town, where police used tear gas Transkei and the homeland policy:

### For blacks — an opportunity or a hollow mockery?

Staff correspondant of

"Independence or no independence, I won't cen Government, which has said it was prehava any blenkets coming into my hotel," said paring blacks for effective government. Paddy Coogan, Irish owner of the Imperial Ho-

Blankels in his parlance means Africans, who wear lineir biankets to ward off the winter cold in the simost treeless, moor-round mountains of the Transkei

The Transkel, an arosion-scarred ares on the Indleo Ocean, was chiseled out by the South African Government to be a homeland for blecks undar the aystem of aparthoid (lagal separation of the races). It is due to become Independent on Oct. 26. There are 2 million blacks living in the Transkel and 1,3 million Xhosa-speaking blacks outelds in while South

Although this independence can be likaned to independence for an Indian reservation in tha United States, the avent does not deserve the vitriolic denunciation it has been getting from many governments and in the press. After all. e number of worse-off "Indien reservations" in Africo already are independent countries. And some African countries have more tyrannical. governments than the Tronskel is likely to

Recognition for epertheid?

retince will referee and recognize take. Thensket pessport the detested system of aparthaid.

But the Transkel can be viawed as a method. Youth vs. homeland lesders of unraveling apartheid.

An indepandent transact with he hadd as not use that repetition power platform for working against apartheld, ac among blacks can be viewed as a cruggla becording to Chief Minister of Justice George twoin these youths and the homaland leaders, Malphylma, who is a brother of the leader of who cumot go into some of the black fown-The Transkel, Chia! Kalser Matanzima. Pre-ships without police escort. cisely because the Tronskel come out of aparthald the South African Government will be ox- trolled by South Africa through the Transkel

Chlof George, who la tough like the boae of a Which asked about the possibility of nation-political machine, says he opposes the use of elization, he said never.

Whiles are all the same — liberals, nation—in the industrial town of Butterworth: Albertals — they all want the opprassion of the olectric project at the confluence of the Taitse black.

The Transkel government appears to be turning into a one-party dictatorship, following The Christian Science Monitor the pattern of much of Africa. This could be an enormous embarrassment for the South Africa.

#### Not secording to pisn

Although the South Africans still control the Transkal cconomically, and although the South African security police are well-known around Unitata, the republic of the Transkel will not work out exactly as the whites would have

Some chaos is expected at independence (youths are reportedly planning sabotage of government buildings), and many of the delained politicians who opposed independence may be roleased.

Then the verbal opposition to apartheld ie likely to begin. Thore are reports that elements in the Transkei National Indopendence Party of Chief Matanzima, which has tics into urban areas, plan some kind of fireworks.

But can the party boat the youths to the punch? And can the government satisfy the thousands of unemployed, many of whom hang around listioss and angry outside Chief George's office.

Prof. Mahleni Njtsane seys he hea recommended that a list be drawn up of all the youths who have auffered or been imprisoned of the hands of the South African Government for political reasona, and that something be

But the young blacks who are leading the An independent Transket will be tladd as a not like Chiar Kalser. The struggla for power

tra losi h to denounce officials of its own cro

York City.

By Richard L. Strout Staff correspondent of The Christian Science Munitor

Washington The army of nonvoters in the coming alection may be the largest in U.S. bislory.

Nonvotors have grown through three presidential elections and a report based on a nalonwide survey from the privately financed Committee for the Study of the American Electorate indicates "it is possible that for the first time in over 50 years, a majority of effgible Americans will not vote in a presidential

The United States has one of the lowast turnouts of the democracica. Hare is the percentaga record of voters for recent elections: 64.0 in 1960; 6t.8 in 1964; 60,6 in 1966; and 55.6

The new survey, conducted by the Pater D. liari Research Associates, Inc., under the sponsorship of the University of Donyar, concludes that nonvoling is more a feeling of what's-the-use (stitudinal) than of physical obstacles (structural).

This is important because congressionol Democrats have been pushing for government dalea' campaigns, why not extend it to halp aid to voter registration which is common in pay for voter registration costs, as in Cannther democracios, and ao-called "postcard registration" has been hotly debated.

The study supports the thesis that a majority nf nonvoters, if they got around to vote, would bers have been giving a 'no vote' to thair leadbe Democrats, At the time of the survey, ers and institutions."

### Lebanon's carefully watched war

By Jason Morris Special to The Christlan Science Monitor

115 CHRIGHAN SCIENCE MONITOR

stales' dispute with Israel un a back burner nunt - Iraq's and Syria's. pending the still-unforeseeabte political autcome of the 18 months of conflict on the far side of Israel's northern border.

Authoritative quarters in the Israelt capital see virtually the antire Arab world ontangled directly or indirectly in naighboring Lebanon. These quortors contend that the future course of Arab-Israell (clations cannot be plotted until the Lebanese fighting is over.

It becomes obvious in high-level conversation here that Israeli t'remier Yilzbsk ttabin and lits advisers have been fidlowing developments across their nurthern border to the

They are ensily fomiliar with alt the splinter militias and paramtilitary forces and yet seem perpetually amazed by the degree of inter-Arab rivalry being demonstrated in the Lebanese imbroglio,

"trso has been airlifting massive amounts of weaponry to Egypt for transfor by ship to the Muslim and Palestinian-held ports," a qualified source aald. Thera was an nir of wonderment that radical Irsq enuld lean on Westarn-orienied Egypt to schiova a common goal: support for the Muallm-leftlst-Paleatinian side in

"Libys has been pouring \$40 million a month into Lebanon, making Lebaneae currency as atoble as aver." ho went on.

The Iraqi motive evidently is to prevent

Syria from achieving hegemony over Lebanon. Rather, Israelis say, Iraq would prefer an anti-Syrtan regime in Belrut if only to sap Syria's strength in the ideological war between the The Lebsnese civil war has put the Arah two cumpeting wings of the Buathist move-

Lihya's purpose is to undercut Egyptian inlibetice in Lebanou while maintaining practical support for the extremist elements on the Mus-

israel has been trying to keep as low a profile as possibla in all this.

The fact that the seadanes between Egypt and Lebanon pass close in the tsracti coast has enabled the Israell Navy to intercept, board, and unload some of the Irani-Egyptian arms

At the sume time, Isrueli field cummaniers hove established contact with utilicers of the illssident Lehonese Arab Army, who apparently detied sympathtzers in Beirut by holding talks on routine frontier problems at the Rosh Hankra border post.

Although Israeli officials refuse to confirm an Israelt military presence in southern Lebanon, events there indicate that things have been going laract's way.

A recent incident: a clash between southern Lebanese villagers and Palestinian guerrillas in which three of the former and four of the latter were killed. It resulted from refusal on the part of the residents of the Lebanese diage of Ain Ebel to readmit guerrillae for future forays across the Israell frontier.

In another case, southern Lebanese rasidents reportedly dismantled a rockot launcher set up for usa against targets in Israel.

Where israelis and Labanesa Army dissidents have met

been partitioned on a de facto basis, with tha Syrian Army controlling the largest aection ning out to the east, the Christians and Muslims holding enclaves along the Mediterranean coost, and Israel dominating the south.

Syrion-tsracii inierest in avolding collisions over Lebanon was indicated by indicationa that not only are the Syrians completely absent from southern Lebanose sectors but also from the northern bank of the region's geographical demarcation line: the Lttant River.

No Ieraeli official will discuss the question of arms shipments from here, but the prevalent broke out.

Somo observers believe Lebanon has already theme here is that Israci's current military posture was, is, and will be a constant factor in shaping the course of the Lebanese civil war. Reuter reports from Tel Avív: Iaraett Foreign

Minister Yigat Allon has sald Israel never could let Lebanon - whatever the outcome of the civil war - give the Palestine Liberalion Organization (PLO) the right to use tis territory for ntincks on Israet.

He told a news conference here Tuesday that israci would not allow the bordor altuation to revert to the way it was before the fighling

#### Gulf of Suez control U.S.-Israel confrontation over

By Jasoo Morris Special to The Christian Science Monitor Tel Aviv, Israel

A series of seaborne confrontationa in the Gulf of Sucz between United States civilian oil prospectors and Israell Navy men has turned into a full-blown ilipiomatic dispute batween the govarraments of the two countries.

The Issue is the precise dalineation of Israell control of the Gulf's wsiers - whether it is a fixed distance from the coast of the Israell-occupied Sinsi or a median line down tha Gulf's

Israel contends the median line sppiles. As a result, barges mannad by U.S. olimen working for Egyptian firms have been forced to atay woal of the imaginary maritime linc.

The incidents, which have flared periodically for more than n week, involved several em- dered to Egypt under the year-old Sinol-II diaplayeea of the Americao Amoco Compony and. engagement pact.

A U.S. embassy official here described the incidents as serious.

They are being taken up with Israel's ambassador to the U.S., Simha Dinitz, in talks at the State Department in Washington. The U.S.-Israeil dispute coincided with an

extraordinary debate in Israel's Knsaset (Parliament) Sept. 7 on alleged Egyptian violations of the Sinal disengagement pact. The Americans hove been involved in Egyp-

lish efforts to expand off-shore drilling at the relatively lucrative Murgan oil field along the Suez Gull's western coast. Directly opposite, at Al-Tur, in Sinal, tsraell

oilmen have been trying to find new oil outlets at sea that might compensate, at least in pari, for the Abu Rudels and Belayim ficide surran-

since the end of the 1967 six-day war (when Isrsel conquered Sinal) ran down the middle of if a showdown in diplomatic quarters ensues

United Nations as well as by Egypt, Israel and countries comprising the UN cease-fire ob-

its basis, the aidn went on, was Israal'a military presence in Sinal.

At the same time, he rejected tha notion that principles of territorial waters or continental shelf might be applied in this casa. .

The underlying Israeli concoro is that extension of Egyptism off-shore oil drilling, evan by American porsonnel, would oventually be foilowed by ostablishment of a permanent Egyp ijan naval control of thase waters.

Unill now, Egyptian naval craft have been

A foreign ministry aide said the line of juris-diction recognized by all interested parties dinn line. Israel'e attitude evidently is adamant, even

between this country and its closest foreign friend, tha U.S. On the other hand, ex-Defense Minister

Moshe Dayan has repeatedly declared he would prefer to-see Israeli forces off the Sinal's western coast.

Mr. Dayan would bave held out this offar in a bld to win Egyptlan consont to end the state of war betwean Cairo and Jerussiem. Without such termination, Mr. Dayan ergues, the much-vounted Sinai-II agreement is worthless.

Ho thinks it unnatural for Egyptian shipping, especially when the Suaz Canal has bean reopened, to have lo pasa Israali naval patrole in the parrow Guil of Suez, even though tha Isreelis keep to the east and the Egyptians to the west of the medion lina.

### \*Kissinger in Africa

The degree of movement is a matter of bitter controversy within the ruling party and the Afrikaner motority among the whites, it is essentially a domestic political problem, but its repercussions lucyltably spill over into Mozamblque and other neighboring black coontries from which a significant number of South Afrlea's work force comes.

From page 1

The preoccupation of the five block preaidents - Messrs. Noto of Angola, Machel of Mozambique, Kaunda of Zsmbln, Nyerere of Tanzania, and Senetse Khama of Bolswana - Is above all with Rhodesia and with Namibls.

If the Rhodesian problem is intractable because of Mr. Smith'a obstinacy, they look to Mr. Vorster to show his good intentions at least by moving Namibia repidly along toward multiracial independence.

Dr. Kissinger's technique will be to act as an "honest broker" between the two sides - Sooth Africa and its black neighbors.

On Rhodesia, the problem involves first and foremost the Smith regime. Mr. Vorster has said he intends to see Mr. Smith, but not Immediately. Separate forms may be set up in which the two different problems of Rhodesla and Numbla will be worked out.

The shuttle will take place between Preforia, capital of South Africa, and either Lusaka (capital of Zambia) or Dar es Sainam (capital

Dr. Kissinger received his invitation to begin his mediatory efforts from Tanzanian President Nyerere on Tuesday, immediately after the breakup of the five presidents' summit.

The Secretary of State was in Hamburg to brief West German Chancellor Helmut Schmidt on his weekend talks with Mr. Vorster and to ask for Wost German participation to a proposed fund to aid transition from white to black rule in Rhodesia. He had already visited President Giscard d'Estaing ol France for the sama purpose enriier in the day:

Dr. Kissinger returns to Washington Tuesday and will awalt the report of his special anvoy to the five presidents. Assistant Secchiling on the precise timing of his trip to Africa. Officials traveling with Dr. Klasinger, ex-

Monitor correspondent David K. Willie reports from Moscow:

Clearly upset at being laft on the aldelines by Henry A. Kissinger's effort to avoid racial warfare in southern Africe, the Soviet Union has stepped up its criticism of the United States in recent days.

In general, the Kremlin appears to sea beneath Dr. Kissinger's diplomacy mora evidence of a broad U.S. push to establish inthe Persian Gulf around the Horn of Africa.

It links this with U.S. policies in the Pacific and sees the outline of a grand design in re- ciallet regime." couping too losses sustained after U.S. withdrawal from Vietnam.

Another wounding factor to the Soviele, il is thought here, is that Dr. Klasinger is not fol- sively" that "some progress" has been made lowing his Middle East paacemaking patiern of assuring Moscow that it wilt evantually be consulted and drawn into the diplomatic process. U.S.-British plan for a fund to enebla, e futore Dr. Kissinger has called Moscow 'not unhalp- black Rhodesian Government to compens ful! In the Mideasi and has talked about Soviet whites who decide to leave. Nor does it refer

Nyerere: pivot in Kissinger shuttis

But in Africa Dr. Kissinger has criticized the Soviet-Cuban move into Angola and srms huildups in atates aligned with Moscow. He has failed to refer to an eventual Soviet role. Tids flies in the face of recant statements by party leader Leonid Brezimev and Foreign Minister Andrei Gromyke that no international problem can be sellied without the involvement of tha Soviel Union.

A atream of articles in recent weeks, culminating in a commentary by veteran analyst Yuri Zhukov Sepl. 7 in Pravda headlined "Dnngerous Maneuvers" portrays Washington as working to preserve racist governments in Pretoria and Solisbury.

The aim, as the Soviets see II, is to protect both the economic "outposts of capitalism" in southern Africa, and to ensure a continued NATO "bridgehead" to control vital sca-isnes around Africa.

Another element of Soviet Ihinking, Western analysis here note; is blunting Peking's influence in southern Africa, believed to be especlally strong in the high command of the Zimpected him to be in Africe by next Monday at babwe (Rhodeslan) Liberation Army, known as ZILA for short.

Recent Soviet press criticism has singled out Dr. Kissinger in person. The Zhukov article in Pravda argues the best way to achievo Dr. Kissinger's declared alms of supporting peace, racial justice, prosperity, and independence in Africa would be to obtein full compliance with United Nationa resolutione that "aharply denounce" the government of John Vorster ond lan Smith, and to comply with earctions against Pretoria for not granting independence

to Namibia (South-West Africe) by Aug. 31. Instead, the Zhukov article says, Dr. Kis-Ruence over the arc of the indian Ocean from singer "prefeired to resume the secret talks" with Prime Minister Vorster, whom the article catis the "ringleader of the [South African] ra-

Miki might well survive," said Gerald Curtis, an American expert on Japanese politica from Columbia University "Removing Miki would domage that party's image with the voters."

Miki's judo keeps him in offe

As an election approaches the Japanese Prime Minister, thrust ford as an interim official, keeps foes off balance amid Lockheed briberyindal

By Dantat Southerland Staff correspondent of The Christlan Selence Monitor

There are times when it seems that Japan's Prime Minister Takeo Mikl has nothing going for him but

Powerful figures in Mr. Mikl'a own party want to throw him out of office, and they have the numbers. the moncy, and the blg business connections to do so. But it is precisely this big-money strength, in this time of scandai, that makes them suspect in the eyes of the Japanese public.

This makes Mr. Miki look sometimes like a maater of the Japanese art of judo, with his opponents' weight and strength working against them.

The question of how long Mr. Miki can sustain his amazing judo act has kept the Japanese guassing far some months. When the elders of the Liberal Damocratic Party (LDP) put Mr. Miki lolo power nearly I'm years ago, they intended that he serve only as an interim premier while the stip heavywel its stilled their interim premier will the still heavywel its stilled their interior and financial support for the top job.

Public opinion rarely has been decisive in the inner workings of the ruling, clique-ridden LDP. In its de-liberations over leadership it is known for being neither liberal nor democratic.

But with the Lockheed bribery scandal still being investigated under Mr. Miki's auspices and with a nationai election dua before Dec. 9, public opinion, qa expressed in influential Jopahasa newapapers, might just make the difference for the embattled Mr. Miki.

#### Above euspicion

The Prima Minister is considered to be above suspicion in the Lockheed affair. Any attempt to ramova him before it is clear that a full invastigation has been completed inight look like a caver-up. It would be coodemned as such by a significant section af tha Japanese public and prasa.

The business establishment appears to be withholding funds from the LDP in an affort to contribute to Mr. Miki's fail. But because his financial needs are relatively few, the Prime Minister, unlika his leading political opponents, is largely invulnerable to such pressure. ila has aniy a amali faction to which he must dispense election funds, and he has never bach in the habit of laviahing large amounts of money on people to get what he wants.

One way of bringing Mr. Miki down might ba first ta cause tha fall of his only poworful ally in the LDP,

been leading a campa to "I don" Hr Nakasone. as the Japanese but it, because of the secretary general's alleged use of his limitance to aucourage the purchase of Lockheed arciaft, by Japan. But bere again, public opinion and the impending election might save Mr. Miki.

"Even if Nakssond fell, leaving Miki totally with-out the backing of major tections within the LDP.

This leaves Mr. Miki'a foremost rival. Deputy Pre-

Prime Minister and Mrs. Miki with grandchildren in the gardan of their private residence

mier Fukuda, in a dilemma; if he acquieaces in Mr. the LDP after the alection. Running as an indepenmay risk his last hope of getting the premiership. If he comes out too directly against the Prima Minister, he risks epitting the ruling party, in full public view, only a few months before a national elaction,

As things stand at the moment many observars, including Professor Curtis, think that LDP losses in the coming lower house alection are likely to be limited. One reason top this is that the LDP has good prospacts of getting most of the successful "independent" candidates, almost all of them conservatives, to join

Miki's continued rule through the coming election, he dent is an old tactic, aimed at avoiding the atigma of being part of the establishment. This year, as a resuit of Lockheed, the number of LDP candidates disguising themselves as independents is going to be particularly high. It may be the highest in postwar

#### A political cushion

The LDP is not expected to lose heavily in the countryside in spite of Lockheed, because rutal people think they have an interest in maintaining the

rule of spaty by them an artificially high, supported does.

In the clights in cushion against severe losses the transfer of Japan's electoral system. Time (1)1' of a substantial number of residente of a loss of the plurality of the sale amonstituencies.

The pair see disenchanted with most politicas die magod might. Professor Curtis this, demonsts disnifection by staying away from the polywould favor the LDP, hecause the voting be conservative older people traditionally base in computison with other

# In Puerto Rico -a boost for classical music

Casals Festival blossoms under Marta Casals Istomin

By Thor Eckert Jr. Staft correspondent of The Christian Science Monttor

Maria Casala letomin on ataga, Puarto Rico Univaralty

San Juan, Puerto Rico This has been a milestone year at the Casala Festivol in San Juan - Ita 20th annivarsary, which coincides with the 100th nuniversary of the lata, renowned cellist's birth.

Many of the active participants - on stage and behind the scenes - have had some contset with maestro Casals (frequently called Don Pohto). But even it they did not, there is an oura, a spirit, a unique commitment to

The guiding light and music director of the Casals Festival Organizatios is Marta Casalo Istomin, Casals's widow and a cellist, singer, and musician in her own right. Her responsibuilties include the yearly festival itselt, leadership of the Conservatory of Music of Puerto Rico, and the Puerto Rico Symphony. These constitute a full-time occupation, foreing her to divide her time between her New York office and between meetings in San Juan of the festival board, of which atte is

.. It all began when then-governor Luts Munoz Morin asked Pablo Casals If he wuutd be willing to start an organization to promote musical culture in Puorto Rico.

#### l ocal talent

As soun as Cosals settled in he saw there was not sufficient training for local talent.

"... There was not an organization that would take caro of music," said Mra. latonin, "There were some music schools, but Casals felt that there was a need for more to be done. . . . Therefore, tha symphony orchestra, which did not exist, was founded, and inimediately afterwards, the Conservstory of Music, in order to provide the schooling for the musicians for the orehestra and eventually for the festival."
We were talking about the festival on a bal-

cony overlooking a giant breedfruit tree. San concentrated effort to include more and Juan loomad in the background. Through the music room, a full-length formal portrait of Mrs. Istoinin was vialbia, as ware a large number of mainentes of Pablo Casals - mamentos destined oventually for two museums dedicated to his memory - one in Puarto Rico and the other in Spain.

It is not possible to talk to anyona who-knaw Don Pablo and not be atruck by the tramandous effact ha had on those around lilm. From dedicated musicians to dedicated supportors, those who knew him revero his mamory as they obcrished his friendship and

That penet of towishing union could be felt at the opening concert of the Festival Or-

chestra, under the direction of Raphael Kubelik. lils performance of Beethoven's Ninth alded hy the Conservatory chorus and soloists Johanna Meler (soprano), Retty Allen (mezzo-soprano), Robert Nogy (tenor), and Simon Estes (bass) - was something altogether spacial. Cohesive, of a whola, this Ninth scaled exceptional heights. Superbly gauged tempos, a vivid peasont quality in the Second Movement, and a metting cantabile in the Adagio let the music carry the emotion without a forced "interpretation" of it. And the finste, a sure show-stopper under almost any circumstances, took on a monumantal someness rarely heard.

#### Not an easy job

Knbellk loved working with the orchestra and loved the festival apirit, Mrs. Istomin recounted. He came without hesitation, as does much of the orchestra each year. "This orchesira makes less money here than in any old job in the United Stotas," Mrs. Istomin mented. "Why do they come hore? Because there is still an aura, o spirit, a tradition. Tids is the spirit we went to keep."

This year the festival attracted seven or eight respected concertinasters to play in the string section, and such eminont soloists as Rudolf Sarkin, Mstislav Roatropovich, Gary Graffman, ond Eugeno Istomin.

But running the festival has not been enay. Funding is always short, and there have been grumblings about local performers and composers being ignored.

"The aymphony storted with six or saven [local] players, ond now we have 28," observed Mrs. Islomin. 'This Increase is quite. considerable when you think that musicians are not made overnight."

After all, what but hears for a my rebasses clusted in the control of the control of

more Puerto Ricans In the Fostival. The efforts continue unabated, and more native sto is being programmed al-festival linte.

Local music education has received an extraordinary boost from Conservatory and government funding - an upprecedented concept that has not happened in the continental United States. Young string playars are being given virtually free lessons for about atx hours a week

#### 500 epplications

"The first day we announced the program; there was so much enthusiesm for it that 500 applications came in with only one ad ona plained Mrs. Istomin. "We had 250 auditions

for these chitdren after the parents had signed a paper saying they were willing to bring thair children three times a week for two hours for each time." ('That restriction was due to lack of transportation, and it put heavy demonds on the parents.) ~

"You can see the interest there was for this program," Mra. fstomin said. "Finally, we could secept 125 students. Onty 20 have dropped out for various reasons. And these children are so enthusiastic, that they are the hope of our future symphony orchestra and tha future of music in this country."

To hear these children - most with just th years of training - playing in a special concert, was to sec demonstrated an extraordinary commitment and enthustasm of teacher and pupil alike. Considering how long it takes to train string players, the results were impressive indeed. And there were some soloists of more than promising abilitlea. This project could not have been achieved without major help from the Puerto Rican government. But Caanis's apirit is tho overriding influance at tha fostival.

#### 'The 'great ideals' of music

"As long as we have people sarving music in his [Casals's] way this will never cad," Mrs. Islamin said. The children who never know him find musicmaking axelling because veneration of the great ideals of music la so atrong at the conservatory.

"This is the spirit we want to keep," added Mra. Islomin. "Wo cannot kaep the spirit by wavering with the wind to whime of the people, but [by] commitment to an idea and lo creative work, [to] being open-minded to-ward progress, td new developments, but al-

vays keeping a tine of action. L'Adi John es lines liceals in music are erved, we will always have people who will como to us. After oil, it is not only Casels and what he was, but what Casnis meant and what he atood for in terms of sarving music sald Mrs. Istomin.

"Just by his being there, the whole thing changed."

Singor Olga Ingelsias, who was later to perform several gorgeous Casala songs with the venerated plantst Mioczyslaw Horzowski, nodded in agreement.

Surely the effect Casals had on Puerto Rico will never be forgotten. The Foatival is testament to that, as are the Symphony Orchestra and the Conservatory. Marta letomin is dedicoled to perpetualing that offeet, that in tituthen, and that stand for quality, parsonally and professionally.

### Even better than pancakes

For yeura serving on American-style pancake to on unsuspecting visitor was the surest way to prove how different the Stoten are from the reat of the world. For the U.S. pancake is as thick and floury as only o cold Scots pancoke can be. But it is served hot and with it comes that most aslonishing combination - buttar, syrup, and bacon or sausage.

Recently America has discovered the crepe - musing out that convenient halfway alep, the true pancake. With this discovery have come new techniques - nolably the upside-down cooking method.

In this orticle, the Monitor's food editor brings readers up-to-date on this fotest of food crazea in North America. Her hints and recipes are applicable olmost anywhere. But those using British meosurements should remember that o U.S. cup equal 5/8 of a British breakfast cup. An American spoon is alightly smaller than a

> By Phyilla Hanes Food editor of The Christian Science Monitor

The upside-down electric crepe pan la tha biggest thing in cookware this year. For some people, crepes are nothing new. To othera, cooking on the bottom or back of tha skillat

But to the everyday cook, this is more than a novel idea. It'a an easier way to make an ultra-lhin pancake.

The new pans, exhibited at the Housewares Exposition in Chicago last month, are electric for controlled boat and they are especially designed to be used upsida down.

You dip the pan in the batter, which you have already mixed and poured into a 4-locb

to turn into dough.

The current craze for crepes, e thin pancake with e filling, is aimilar to the receot fad for quiche, with its ple-shell base and custard fillings of cheose, mast, or vegetables.

Both are French dishes, which possibly adds status. Bul they are typical of the challenging recipes homa cooks readily accept today.

Pronunciation a problem too Along with a reputation for being difficult to make, crepea present another problem - pronunclation. There are two ways. You can rhyme it with gropes for the American version, or rhyme it with ateps for the French.

Crepe is e French word maaning paneake, but a similar word could have been chosen from almost any national tongua. There is the Hungarian palacsinta, crisp, but teoder and fluffy with beaten egg white, filled with apricor or atrawberry preservos, topped with whipped

cream or melled butter. The Russian blini is made with buckwheat flour and filled with caviar or picklad herring and sour cream. Taco crepea are thinner than a regular taco, but with the sama shapa, saasonings, and shredded lettuce.

Jewish blintzea are cooked on one aide, the brown next to the filling of cheese or fruit, uaually. Then there is the Norwegian pannakaker,

the Italian conneiloni, and other crepe dishes, Cropes Startle, served flaming, a symbol of French eleganca, and "croperles," or restaurants featuring only orepes, have been on the scene in large cities for several years,

Origin of upside down method

Palacsinta might have been a more logical name for pancakes made with the new upside.

#### Off-beat salad

financial

facing lawmakers this session is now coming to a head here: how best to prevent corporate bribes abroad by U.S. corporations.

Coming against a backdrop of mounting political furmoil in Japan and the Natherlands, triggered by Lockheed bribery disclosures, political bribery is now expected to be an almost certain point of political controversy in the upcoming U.S. presidential election.

The Ford administration position remains elear-cul: lagislation prohibiting foreign bribea would be almost impossible to enforce, while existing laws - requiring disclosures of paymonts of "moteriat" significance - ahould be adequate for the future.

On the other hand. Democratic presidential contender Jimmy Carter has bronded Ford administration proposals a "eover-up" that signaf U.S. corporations to "go ahead and bribe."

Now, standing square in the center of the

lup of a can, loasting bread on the sides of the For its part, the SEC requires disclosure can, cand, yes, hoding water in a paper At the same time, the measure prohibits overseas payments os does the 1977 foreign cup. In no time flat, I was enjoying a tingerlickin' morning meol.

The point at the demonstrotton? "Imogine." Dinn said as we looked out over the busy streets of Boston, "that this was your campsib, and you were looking down over the tops of the pine trees to an azure lake in the valley

Miss Thromas is, in fact, a home recommist who has combined her professional skill with a long-slawling love of the great outdoors to become a surl of "ramp economist." She is on the faculty of thrigham Young University where she teaches hame economics as it relates to earnping, picnicking, out to home-style barbeculng. "Remember," she soys, "the great ouldoors starts in your own backyard."

Bul back to the balcony breakfast I enjoyed recently. As a camper myscit, I have couked

kerosene stoves, and more recently over one of those lofe-along gas ranges. But never did 1 imagine a couple of empty cans, some corrogated cardinard, and a little pandlin wax could be such an effective stove

Here is how to make the slove. Take an empty number-10 can (1 gallon), says Miss Thomas, remove one end completely, and wash the can.

With a pair of tin snips make two cuts up the sale of the can from the open end. The cots should be about three metes long and four nickes apart. Pull out the piece of metal in between the cuts so that it resembles a partlyopened overhead garage door.

Slip the mose lid into the can and press it up against the closed end This will provide u double thickness of metal for the cooking surtage of the store Next, take a panich-type can orener and namel about tive smoke hides just below the rim of the can. These number holes will also hold the loose end of the can firmly against the clased end.

For the hurner - or "buddy hurner" as Miss Thomus calls it - take an empty small tunafish ur similar-size can and till it with a rolledup strla of corrugated cardhoard. Cul across the corrugations, so that the holes show. Mell a standard-size block of paraftin wax in a double boiler and pour this over the cardboard. You can use this right away or let the wax over an open fire, Boy-Scout style, on pump-up harden. Now it is ready to burn. For easy light-

U.S. farms suggest new energy sources

At South Dakote State University, engineers essembled a low-cost, aeadwich-type solar heater in which e two-inch air spaca was the "filling" between black aluminum roofing panels on top and plywood panels below.

Air which reedlly heets up 10 to 15 dagreea F. during the haying seeson is drawn out of the "sandwich" by e fan and puahed through a duct to the hay stacks.

At Ames, Iowa, almitar "made-on-the-farm" solar collectors were found to cut elactricity consumption by up to 50 percent in the drying of grain. Iowe Stata engineers Gerry Klein and Glen Kranslar calculated aavings in alectricity at 2 cents a bushel on the 3,500 bushels they vorked with last fall.

Meanwhile the windmill, once common on the prairies and still much in use on Pennsylvania Dutch farms, is elao being looked at anew. Some wind-generation units are on the merket; but Lco Solderholm of the USDA's Agricultural Research Stetion at Amea, Iowa, believes their general acceptanca on farms is On top of this are two feet of fresh water that ete electricity with them, he eays, "but not on

### Finger, elbow, or fist paint

To make some really fantastic finger paint here's what you will need:

i box soep flakes (not powder) t tablespoon liquid starch Vegetable coloring

Mix soap flakes, coloring, and starch together in a large bowl, adding water a little at a time. When the mixture la thick and jelly-like, beat it well with a enoon or

with an egg beater. Put a big spoonful of psint right on a formica table or countertop, or en area covered with oilclofh. If you heve none of

these, you can use the bottom of the befhtub. But, don't use it on o wood surface!

Experiment with the kinds of designs you want to make, painting with your fingers, your fingernails, your elbow, your whole erm, your fist.

When you have a design you like, leave it while you wash your hands. Thon take a piece of paper big enough to cover your design and press it down on top, rub It welf with the flet part of your hand, and peel it off carefully. Your picture will be a 'monoprint.' It will be thick and a little shiny, s really different kind of finger-

### Sollen wir es noch einmal versuchen?

Manchmai ist es so, daß wir uns sehr abmühen und doch nicht unser Ziei errelchen. Sollen wir es noch einmal versuchen oder es ais hoffnungsios aufgeben? Dte Antwort wird hauptsächlich von der Art des Ziels abhängen aowie davon, wia wir gearbeltet haben, um es zu erreichen. Es kann ein großer Unterschied sein zwischan rechtmä0igen Zielen und dem, was wir einfach haben wollen.

Christus Jesua sagte: "Bittet, so wird euch gegebsn; suchet, ao werdet ihr finden; klopfet an, ao wird euch aufgetan." Ein Lesen dieser Staile, loagelöst aus dem Zusammenhang der gesamtan Lehren Jesu, könnte nahelegen, daß wir alles bekommen, waa wir wollen - doch für unsere wirkliche Sicherheit und unsar wirkliches Wohlergehan Ist aa gut, daß dom nicht so ist. Jesus lehrta uns nämlich, worum wir bittan, wo wir suchen und sn weiche Tilr wir klopfen solien.

Jesu Lehren siad auf unsere und aile Zeiten anwendbar. Dia Christliche Wisaaaschaft\* fügt seinen Lehren natürlich nichts hinzu, aber die Entdeckerin und Gründerin der Christlichen Wissenschaft, Mary Baker Eddy, formuliert dia grundlegenden idean des ursprünglichen Chriatentums neu und gebt weit mehr ins ainzeina. Io ihrea Schriften wird deutlich und verständlich gemacht, worum wir bitten und was wir zu empfangen erwarten können, wo wir es suchen und finden können und an waiche Tür

Der Ausgangspunkt ist dar gieiche wie in der Bibel – der zu Gottes Ebenbild er-schaffene Mensch. Er ist mahr sis nur ein Ideal, auf das wir hoffen können, dar Mensch, den die Christilche Wissenschaft

darsteilt, ist das wirkliche Schst eines jeden von uns, hier und jetzt. Das bedeutet, dati die Anforderungen, die an uns gestellt werden, in Wirklichkeit geistig sind.

Dies bewirkt alne völlige Neuorientie-rung unserer Einstellung, unsarer Hoffnungen und unserer Methoden des Suchens und Findena. Ganz praktisch gesehen, heißt das nicht, da0 wir weniger beharrlich auf unaere Zleie hinzuarbetten brouchen oder da0 unsere Wünscha verfliegen oder daß wir weniger das Gefühl haben werden, etwas gcicistet zu habon, wcon wir das Ziel erreichen. Es badautet einfach, da0 wir daan einea geistigen und nicht einen materiallea Gewinn anatreben

Zum Beispiel war es einmal crfordarlich, da0 ich einiga Erfindungen auf dem Bausektor entwickelte, die sich patantieren ließen, Ich war ernsthafter Anhänger der Christlichen Wissenschaft und immer bemilht, ihre Lehrea bei meiner Arbeit anzuwenden. Obwohi ich diese Lehren keineswegs völlig verstand, ging ich dennoch an jedea Probiem hersn, indem Ich in erster Linia daran festhieit, daß der Mensch das Kind Gottes und nicht lediglich eine materielle Anordnung von Molekülen ist. Das bedeulete für mich, da0 Gott, und nicht meine Fähigkeit, die Dinge zu meistern, die Lösung für mich bereithielt. Ich begann also zu "suchen", versuchte zu verstehen, was schon vorhanden sein mußte - was Gott schon zur Vardürfnis zu entsprechen. Ich suchte meine Lösung in einem besseren Verständhis des geistigen Seins, nicht in meinar eiganen Schöpfung von etwas völlig Neuam. Ich klopfte sozusagen an dio "Tür" des

Bewußtseins und nicht an die Tür, hinter der man nur menschiiche Mittei und Wege findet. Und wo die Umstände ea wirklich erfordarten, daß ich meine Ztele erreichte. erreichte ich sie auch - in diesem Falle wurden Patente erteilt, so da0 die Bedürfnisse des Augenblicks befriedigt

Wir können aliea tun, was zu tun geiatig richtig ist. Mrs. Eddy schreibt: "Gott bringt 1m Menschen die unendliche 1dee zum Ausdruck, die sich immerder entwikkeit, sich erweiteri und von einar grenzenlosen Basis aus höher und höher ateigt. Gemüt offenbart alies, was in der Unendlichkeit der Wahrheit existiart."

Wann wir das geistige Verständnis vom wahren Wesen des Menschen als Kind Gottes suchan, werden wir das Gute sehen, das wir sehen müssen, und wir werdan es uns zu eigen machen. Fehlachiag wird nur darsuf hindeuten, daß dss Verlangon nach geistlgem Verständnis ernauert und crweilert werden muß. Hoffnungslosigkeit ist nur dann berechtigt, wenn wir dia golstigen Formen des Fortschritts abiehnan und ien Blick auf materielien Gewinn richten.

Matthaus 7:7: Wissenschaft und Gesundheit mit Schlüssel zur Heiligen Schrift, S. 258.

# Capturing fame photograph

"Rodin was solilary before he became famous. And Fame, when It ceme, mede him if enything still more solitery. For Feme, efter all, is but the sum of ell the misunderstandings which gether shoul e new

And so, this picture may be of Rodin. But it is about what it is to be femous. It is about loneliness and remove and reverence. It is about the mester-to-be, photogrepher Edward Stelchen, and the Ilme in which he viewed the master-thet-wes, sculptor Auguste Rodin.

'The event thei made 1901 memorable to me was the opportunity to reelize my dreem of knowing Auguste Rodin," the photographer recalled. These were not the excilements of e medie-eddict flesiding his machine in the fece of the here of the hour but (for good and ill) e profound worshipper et e shrine of ert.

One lete effernoon in Peris, e painter-friend of Steichen'e mede the longed-for introduction. There was a levish and iulting supper under Jepanese paper lanterns and, as the artists set in the efterglow of fine food, the moment errived: "with fear and trembling," the photographer pulled out his work. "Rodin went through the prints slowly," Steichen would write later in "My Life in Photography," "peusing now end then to look et one for some time, end giving grunts of epproval end, sometimes, words. When it was all over, I blurted out that the greet embilion of my life was to do a portrait of him." The sculptor clapped his hand oo Stelchen's shoulder. "You see, Fritz," he said to their chered friend, 'enthusiesm is not dead yet." The photographing would go on.

For a yoar, Staichen spent Saturdays studying Rodin while the orlist walked emidst the work of his sludio, e plece dense "with plester, bronze eod clay being worked on." Steichen's most famous photograph, e studied silhouotte against cests of The Thinker is probably "more of e picture to Rodin than it is of Rodin," Steichen admitted "becuese, efter ell, it essocietes the geniue of the men with thet expressed by his

The same might be said hore. Although we ere near to Rodin, as near as size permite, we ere not close. We cannot see his eyes. We cannot reed his thoughts. We ere no more intimote, one might guess, then the 22-year-old pholographer was to the 61-year-old mester; we have merely e sense of the gulf between the established genius and the still tentative one. Although a friend of the artist claimed a Stalchen photograph that year cought the real Rodin "between devil end men" it does not seem so here: One does not see the ertist as "slocky figure welking rapidly towards the house," as Stoicben first glimpsed him; there is oo sense of e squot body, no feeling of the museular oction of a sculptor, nor of any artist grubby from the work at hand.

Impenetrable ee a human being, then, Rodin in his fuzzy nobility suggests the early Steichen, the self-procietmed "improssionist without knowing it," rather then the men portrayed. Ite quelities related to the photographic mode of the hour, not the subject. Like the work of Clarence H. White and Alvin Lengdon Coburn, the style "wee cherecterized" by soft focus, deep shedows relieved with brillient highlights and streng linear composition," as historian Beeumont Newhall records. At the seme time, the misty ertsiness of such studies wheo shown in Stieglitz' New York kallery and the magazine "Cemera Work" helped elevate the stetus of phologrophy and presaged Stelchen's leter portraits from J. P. Morgan to Ketherine Cornell.

later on; Rodin hay have been the most removed in his genius. Cortainly no single artists, even in that genius laden generation, ever loomed so in his chosen field as Rodin in sculpture. Rodin's achievement stood — attli etands - in isolation; one travels the distance to the Renaissance to find paers. By the time Steichen met the masicr, his,"The Age of Bronze,"
"The Gales of Hell," "Le Penseur," the renge of figures from the animated burghers to the inciseful Balzac would find their neerest kin only in the works of Michelongelo. ...

Thus, though there is e sense of gonius and ewe in this portrait; of wells of reserve and of great though fainly perceived power in the aculptor's hand, there is neither artist nor human being here. The picture is of o nollon of genius as much as a man. Biunled by roverence, even Stelohen's own genius found Rodin unroacheble.

'Portreit of Auguste Rodin': Photograph by Edward Steichen

#### The person inside

T. 1 200 17.

People move about me fulfilling the lask of the moment Like me, I think, dreeming they ere what they ere not. Small end minute we appear, like automatons, responding to controls, Doing our dally roution for company, government and whatnot.

But hidden beneath our eppearance lives enother world Composed of different feces and memorable deeds performed. Of unexplored pieces end creetivity born All living within us, ellent to the outside world.

What ero a man's dreams if not the reelity of himself? Do I know a man by what he does or the firmament within? Cen I suppose that I know him that I greet but does not speak? Is the mask of our exterior the true cloth of bur kin?

No. It is our dreams that make and guide us. Some move to catch their dreems, while others drift about But all of us are thexotably moving toward our inner hopes. Toward the fulfillment of ourselves that last greet redoubt.

Herb Field

THE CHRISTIAN SCIENCE MONITOR Mondey, September 13, 1976

#### Point of no return

No. I will not look back. What good lies in the looking back if there Is nothing on the lendscope where a Cemeint once stood?

Hands of my clocks more forward; do not change direction Rind upon my will alone A new infermire rises with this range of monutains to be crossed, where stone by stone I'll pick my way to summits that will show what les before me. (Valleys in the sun? Forest ever green, where rivers flow and nater falls? Where thoughts may rest, or run?)

To those returning, here's my best (Ench weighs the journey with the price.) But truth for me is held in this mivice: "Start where you stand, and do not mind the past."

\*I Quatation by Herton Broley)

### From Russia with poetry

bluried out, more es en ennouncement than resolution "liere I decided to surpess Sergel

It was in a Moscow: park, it was spring, and the worker who meterialized behind the voice was looking for en audience. He deposited himself on the hench, paused only briefly to verify that his new ecqueintence did understand Russian, and recited his latest cre-

His unshaved face was topped by e gray and white cloth cap. He had never quite finished lucking his shirt into his beit thet morning. His laces ran impatiently only through the bottom and top cyclets of his shoes. His hand was tettooed. And he lived up fully to the Russian reputetion of loving poetry pes- Chine egain, so he quickly and drematically

Once or twice no interrupted his decleme-Uon to explein that Elizevete Ivenovna in the fourth line was his mother or that Kresneyn. Presnyo, the well-known workers' district, was where he lived.

The gist of his "Coofession of a Hooligen" (a lille borrowed from 1020s proletarien poet Sergel Esenin) was that he scorned the beeutiful and edmired the unilvely. The lenguego . was poasant colloquial.

The meaning wes e bit obscuro to e foreignor hearing the poem for the first time. So I esked if I might read his menuscript myself. No eterted to hend it over, suddenly thought of a better idoa, and trotted over 10' the noarest bulletin board where the day's Provide was posted for public reading. .

over Pravda, then jumped two times until he successfully retrieved a box that hed been d there. He returned to the bench with

lleving thus devised a lep deek, he borrowed pen and paper from me and proceeded to copy the online poem to present to me. Nolther the passing mothers with havy cer-riagos, the high-spirited dogs, the small boys on wobbly trainer bikes, nor the older ballbouncing children disturbed his coccentra-tion. He was absorbed in his work, and he bolbed his head with satisfaction at the com-plotted of each line. At the end he signed his

"I'll reed my poetry to you," a mole voice name with en illegible flourish and added the

"Where ere you from?" he inquired finally, and scenned not at all surprised by the answer. "Oh, yes. America. Whet sinte?"

I told him Mussachusetts and asked if he knew where it was. "How could I not know? he responded in surprise. "I have a mep of the world on my well. . . . Do you know, which is the biggest country in the world?". "Chine?" I ventured.

"No," he corrected me, quite accurately in terms of area. "The U.S.S.R. My motheriand. And do you know which is the second terg-

He sensed that I was about to propos replied himself: "Americe! . . . Don't forget

"In lend the U.S.S.R. is first. In population It's third, China is first: India is second."

At 11ds point the enormity of superpower responsibility ceme home to him, end he urged, "America and the U.S.S.R. must never fight e war. Too meny people would perish. Remember that a real Russian muzhik [peasant] told you that

"Do you know thet the Russians and Germans fought eoch other?" he went on. "I was In the ermy in the Ukreino. He was my commender." He gestured as if firing e machine gun and nodded toward the nearby statue o Marshol Fyodor Tolbukidn and tho pot hydrangee someone had set et its base. " lought everywhere - in the Ukraine, Germeny, Hungary, Poland, Only I wesn't in

The worker poet voluntoered further that he hed a apisndid wife and three sons, that he his prize — a checkers set that wes obviously didn't catch, and that he writes poetry when the communal property of the clusters of he can't sleep at night. He also gave his year men who compete and kibbitz in this game in of birth and confided that he was now going the perk every afternoon.

"We are educated now," he continued en thuslastically. "Everyone is studying, We-don't just drink vocks any more."

Then, as abruptly as be had appeared, h isft. "I'll go now," he announced, and said good-bye in Russian. He walked tah pares in the direction of his pronze commandor, then turned impulsively and edded, "Adlett."

that ktr

Almost a year ago I went to see the Minister of Justice, J. T. Kruger, and expressed to him the foar that South Africa might be in for serious urban violence, and that such a situatiun could be doubly dangerous because the government appeared to have nulody to necotiate with as the real leaders of urban black South Africo were either in juli or banned.

I mado the obvious point that one caunot negotiate with a leaderiess mob, and suggested that the government should, in the Interests of nailonal stability, allow natural leadership to emerge and function openly within the limits of

The following article, slightly condensed

here, was written by the editor of the

East London Daily Disputch for publicu-

tion in South African newspapers.

ven Biko, then 28 years old, who for some at 42, with oil the benefits of a white education, years had been under banning orders in King I just couldn't match with with this relative William's Town. I said I had got to know Biko youngster. personally, and that the Minister should consider lifting tha restrictions on him and allowing him to exercise his considerable gifts of leadership - no doubt under the watchful eyea had helped to lsunch, as a negstive and retro-

Oce of the lavorite American myths presumes that

there are no problems money against solve. At least for me: Sure other people don't seem to have the knack for

handling the atuff when thay get it. But make us rich

And so, in the back of the mind of many would be lib-

erated women - or perhapa tha front - dwells the tixed

ides that tiberty and your own bank account are synony-

mous. In a recent Village Voice, Jane Lazarre states the

law thus: "A woman will never be free until she earns

her own living." Adding that the maxim falls on har ears

'like "a commandmeni from a naw, fcminine Jahovah -

She builds her case forcefully. To husband, sha points

(we cry), and we'll take it from there. Trust ua.

### OPINION AND...

### South Africa will regret banning its black leaders

By Donaid James Woods

he acted lilegally. Actually, as a journalist who has interviewed politicians not only at home in South Africa, but in America, Csnada, Britain, Germany,

France, Italy, and Iarael, I have not met in sny of these countries a msn as gifted with intelieet, personality, and burnsn understanding as the same Steven Biko. A former medical atudent who had to leave

university when he was banned, he turned to studying law by correspondence in the area to witch he half been restricted, and as so many people who had met him raved about this extraordinary man who aecmed to have "dischpies" all over the country, I decided to find out what was so special shoul him.

As the area to which he had been restricted was less than an hour's drive from my home, I oflen viaited him there for long discussions. They ware highly stimulating discussions, and

Initisily there were several areas of diaagreement between us, as I had long regarded the black consciousness movement, which ho of the polico and conscious af the massive ar-

ray of laws which could be used sgainst him if But with increased understanding of nil it impiled came the realization that in today's eircumstances its validity could neither be rationslly questioned nor fully comprehended by a

> The movement's scherents were impressively different from most blacks one encountered. They walked taller, were more confident, at ease and articulate. Ironically, for purveyors of black consciousness, their blackness was the easiest thing to forget about them. This was particularly so in Steve Biko's case in that hits personality and philosophy far rsnseemied matters of race and color.

Those discussions were indeed memorable. His first remarks were invariably humorous ones in Xhoaa, then he would switch to English. And what English! There is no member of Parliament in this country who uses the laugusge with more effective case. And his Afrikaans Isn't too bad either, as he hos a deep interest in language - an attribuite which usually goes with a deep interest in people.

I tried to convey to Minister Kruger what Steve Biko was really like, and pointed out that apart from a traffic fine he had never been convleted of any offense. I ossumed he had been banned for founding SASO (South African Student Organization] and helping to lounch the black consciousness movement, although

[Robert] Sobukwe, Biko is the leader most highly regarded by the more politically away urban blacks - especially the youth.

I stated further that my own laterest in the matter was to try to help avoid a situation a which black frustration would give rise to mindless violence through lack of articulate leadership, and said bluntly that as the father of five children I was as concerned as any pareni to help keep the peace.

My plea obviously fell on deaf ears, because several weeks later the restrictions on Stare Biko were actually increased. And now be be been iletained. I don't know where he is being held, nor do I know what they think he is

By normal standards I am a fairly course tive sort of bloke, not unduly naive mis. eosily impressed by politicians. But ITEM one thing - make a note of the names. Biko and remember it well. One war are other it will be writ large in the South Africa

He is not the first potential prime winter to be detained without trial in this county but I hope they treat him well while he is to side, becouse he has a remarkable memory. And so have his friends

### THE CHRISTIAN SCIENCE MONITOR COMMENTARY

Joseph C. Harsch

### Kissinger wants Kenya-style change in Rhodesia

since independence is the key to what U.S. Sec- The transition was gradual. The white popuretary of State Heavy Klssinger is hoping to repeat by his current diplomatic efforts over southern Africa. On his part, the "push" is nn. He is trying to get a "Kenya-type" solution for

Kenya was granted its independence from the British Crown on Nec. 12, 1963, 11 was done with tirlish pomp and circumstance. Prince Philip presided. Dritish troops "beat the retreat" for the last lime in Kenyn. The tinion Jack came down. The new Kenyon fing went up. There was no blocksized.

But before the final ceremmy at Natrobi great deal of "arranging" had taken place Part of the arrangement was British immey to help buy up the farms of white settlers and help provide for their resettlement in other ploces. Part also involved the continued employment of white British civil servants und military officers in the Kenyan Government

merly run its political life, and Dritain all ben- veloped over such a span of time esnnot be

The story of what has happened in Kenya efited from the terms of the "arrangement" lation has since dwindled, but painlessly. No one lost his land or his property without some compensation Blacks have taken over the top jobs in government one by one and step by step, not all at oure.

The result has been annimum interference with normal processes of government and little dislocation of trade and industry. The number of whites continues to dwindlo. But those who remain do so with the consent of tha ruling black community. Kenyo continues to be a trading partner of the Western enmmunity

umin friend of Great Hillain. The Kenya story and the Angola story are opposites. In Angola, there was no lang-term planning, no arrangement for respecting white minnrity interests during and after the tronsitiun, no provision for the transfer of white in-

Angula had been run by s white fortuguese minority since 1575. Four hundred years is a The new Kenya, the whites who had for- long time. Itablts und patterns which have de-

were dispossessed without compensation. Must people of the managertal and administrative classes tied in Unringal. Trade and industry come to a balt.

The lighting in Angola more or less ended in mid-February. Some whites have straggled back sinco. But the diarupilon of trade and industry has been an economic disaster for Angois itself and a severo loss of acanomic valuen to Angola's former trading partners.

Chuld the Angola story have been uvoided? Yes, of course, if Portugal had planned woll ahend as the Itrilish did in Kenya for the grailual transfer of antimrity in the black community with sofeguerds for the white minority and with great care to have a gradual transition in government and in the economic life of the community. But the Portuguese had not seen the change coming. They did not plan.

In the Kenya story, Britain pul up the outside funds which were essential to the gradual

smashed overnight without drastle dislocation nomic empersation there probably would nt every kind. Many of the whites who re- have been a white panic, a sudden emigration garded Angela as home, with much reason, of the whites as in Angela and severe ecnnomic distriction.

> Perhaps the biggest difference made in the hodesta situnting of late has been the willingness of Dr. Kissinger to contemplate an Amerlean investment in a similar orderly transition for Rhudesia. There will be American dotiars available, and for a good reoson. Dr. Kissinger did apend American cloitars in Angola - in a bolated and disastrously unsuccessfut effort to hoad off a mlittary victory by the self-styled ond Mnscow-backed MPLA (Popular Movement for the Liberatinn of Angela). If Amercan dollars are going to be apent anyway, it'a better to apend thom an a peaceful and ordarly Iransition than on an unsuccessful offort to back o military faction - cinndestinely.

The question still pending is whother ian Smith will accept a pisnned transition to black rule in Rhodesia even with aafeguards for the lives and investments of the whites. That is for transition. Without the arrangement for eco- Dr. Kissinger to discover by his diplomacy.

### New confidence and vigor in Pakistan

The sight of turbaned Sikh passengers and Hindu couples at Pakistan'a atrports is an unusual ooc, but the Pakistan of today is an unusual one - different from the one that oxisted before East Pakislan in 1971 broke away to become Bangladesh.

. It is no longer the gloomy country that despatred when 90,000 of its soldiers and civilians were in Indian esptivity, a guarrilia war had erunted in Baluchistan provinco; and there was talk of further fragmentation of the battered country. Today, there is new confidence and vigor in the country, a confidence that seems to stem from the country's achievements on three main fronts - economic, potitical, and in-

On the economic scene, Pakistan did not coltapse when East Pakistan separated nor when its oil bill soared to o staggering \$400 militon o year, Indeed, the country's foreign debis exceed \$5.5 billion and the cost of servicing this debt annually comes to \$300 million every year, or about a fourth of what II oarns from ils exports. The terms of trade also go against Pakistan; this year its trade deflett is likely to run a billion dollars. That la close to what the country will export this year.

But Pakisian will be able to bridge the gap

because of foreign aid it will receive from traditional sourcea (the West), Communist countries and the oil-producing notions.

ii also benefits from Pakistania working abroad, mostly in the oil-producing countries, who aent \$300 million bome this year. Tourists visiting Pakistan spent another \$300 million.

So Pakistan will have enough money to pay its bills and pursue its development pian, which calls for it to become a set exporter of food is three years. The country is also looking for oil and is confident of finding II in commercial quantities. Even if it does oot, the country will manage very well so long as this extrs help la available for several years to come.

Pakistan is also enjoying political atability. Though the loss of Baogladesh was a trauma, the operation cured Pakistan of political schlzophrenia. The Pakision of today is more manageabla and compact. The revolt in Baluchistan la over and the government is planning confidently for next year'a olection.

It is generally agreed that, if there is a frea clection, the Pakisian People's Porty Minister Zulfiquor All Bhutto will win by o landslide. The Bhutto regime is tough on real or imaginary political opposents and it has retoined the oppressive lawa which give it arbitrory and

them. But its economic policies have endeared It to the working people, who were suppressed under the Avub Khan regimo. On the international front, Pakistan again is

doing well. Most Pakistanis seem to reatize that the clock cannot be turned back and that East Pakistan is indeed gone and gone for good. But they take comfort from the fact that, notwithstanding the disputa ovar The diviston of assets Pakistan and Bangladesh have managed to develop excellent relotions, including diplomatie, communicationa, postal, nir, and irade

> Relations with India have also improved mormously. For the first tima since the 1965 war, the two countries have Irade, diplomatic, communications, air and rall tinks. Familiaa which had been separated for more than 10. years are being united across borders.

> Although Kashmir remains an emotional and thorny issue and the Bhutto government maintains it will not compromise on it, it la not ready to go to war over it. Nor is it using the dispute as an obstacle to cooperation with India for mutual benefit.

Bhutto'a visit to Afghanistnn this apring also apparently had paid off to some extent. The two countries have stopped their propaganda war, and tha two countries may exchange om-

wide powers. Nor has it healtoted in using bassadors, if the propaganda war remains suspended and tha two countries start to cooperate in various fields. Pakistan will see that as a positive gain.

Relations with the U.S., the West, Cidna, and the oll-producing and the "third world" countrics also are good.

The one trouble spot for the Bhutto regime involves the \$150 million reprocessing plant the country is planning to buy from France. Paki-stan ia pisnning 24 alomic reactors to lessen its dependance on costly imported oil. As part of the complex, it wants to buy the French plant to reduce ita dependence on imported raw matorials for its reactors.

The U.S. and Canada maintain that reprocessed materials could be used to manufacture alomic weapons and thoy went tighter safeguards. If they are not actisfied nn this issuc, the U.S. may suspend its aid to Pakistan while Canada is likely to stop the supply of raw materials and spare parts for ite nuclear reactor in Karschi, which supplies the city with most of its powar.

Tha problem la a tough one for the Bhutto rgimo. If it weathars ii, the future both for the govarnment and for the country looks brightar than the Immediale past.

Mr. Ali Khan is o Pakistani-born journafist nom resident in Conado.

### Time to fulfill Picasso's wish: return 'Guernica' to Spain

Is money the only currency?

Melvin Maddocks

power and independance is nn Illusion." Moncy, she ar-

guaa, is a Pandora's box; it croales of least as many

problems as it solves, including moral problems. What

money is "hers"? What monoy is "his"? When does "oeed" become "greed"? Money, Vivian Gornick goes

so far as to complain, ultimately produces not power but

powerlessness, like any self-stimulating demand in hu-

The irony for tha Gornicks, then, is that the Lazarros

are buying a male myth which has already damaged

American charactar quite onough. For money, tradition-

ally, has been one of the cruder masculine fantasies,

promising the power to manipulate other men and ac-

quire and possess woman. When Jane Lazarre says that

"the 'real' facts of life . . . In this society are per-

vasively economic," does she maan that women have no

Is there no other "weslih," no other "value" finsliy

but money? Is there no other measure for rating men

(or now women) except by thair earning "power"? Is

money so singularly important a value that, if you have

it, it doesn't seem to mattar how you got it? And if you

don't have it, you could be doing the most nurturing kind

alternativa but to play the same geme, bsckwards?

In the majority of cases, particularly in Europe, what General Franco meant to Spain, tha and wisnes: "Guernica" had to return to Spain
consequences of his departure from the scene. When General Franco no longer ruled and
and what the new Spanish situation is like have when there was a damogracy there. "Mon-

and what the new Spanish attuallon is like have been properly apprediated But this has not always happened in the United States in could be try from which Spanish's expected more understanding and response. I am not referring authentic dictatorships while there are more understanding and response. I am not referring authentic dictatorships while there are more properly apprediate but to the government of the United States but to a witch allow, the maximum interplay of counterstand that things have really changed in the spanish have really changed in the spanish pathting "Guarnica" now hanging in the Missaum of Modorn Art in Naw York. It was painted by the Spanish pathtor, pable Picasso, on commission by the government of the Republic during the Spanish pathting belenged to the Spanish people and that it would return to Spain when there was a damogracy there. "Moh. of the great painter because republic were irrelevant notions but the great painter because republic were irrelevant notions but the great painter because republic were irrelevant notions but the great painter because republics were irrelevant notions but the great painter because republics were irrelevant notions but the great painter because republics were irrelevant notions but the great painter because republics were irrelevant notions but the great painter because republics which allow, the maximum interplay of civit liberties. The span is not incomplete and the spanish pathting it is spanished by the great pathting in the maximum interplay of civit liberties. In Spanish is nonarchy which is maximum interplay of the civit liberties. In Spanish in the maximum interplay of civit liberties. In Spanish pathting it is spanished by the great pathting in the maximum interplay of civit liberties. In Spanish pathting it is spanished by the great pathting which allow, the maximum interplay of civit liberties. In Spanish pathting it is spanished by the great pathting which allow, the maximum interplay of civit liberties. In Spanish pathting it is spanished a period of hina months.

Nobody doubts that things have changed in . Today the voices of Spanish tawyers, in Spain. The leaders of the opposition fall pubtellectuals, artists, and politicians bave affect licity to recognize the changa only for reasons in pleas for a return of "Guernica" to Spain in pleas for a return of "Guernica" to Spain in pleas for a return of "Guernica" to Spain in pleas made by the Spaoish people in the continue to the co but pressure on the government since this dependently of the government. To date nothing the specific has made it possible to reach the trig has been achieved. present improved state of affairs.

But in private conversations members of the opposition recognize that the regime of Cen-eral Franco is finished and that hardly sny-

ship, are organizing themesives.

Many Spanishts, who are aware of all that has been achieved in a few months without a civil war, are somewhat disappointed by the incomprehension or ignorance expressed by

We Spanlards need our friends in America lo believe that the situation in Spain has changed; regardless of the official statements made by one side or by the other.
